

AFRA Industry Statement regarding the “AFRA Pledge”

AFRA: Leading the Way for Sustainable Aircraft Recycling

The Aircraft Fleet Recycling Association (AFRA) is the leading international association representing the aircraft disassembly and recycling industry. Our mission is to support the aviation sector **to ensure that End of Service of aircraft for disassembly and recycling is performed to highest and managed practices. AFRA can do so through its accreditation programs to its BMP standards of disassembly and recycling. In doing so AFRA can fulfill** environmental and circular economy obligations and goals by promoting the best practices for disassembly and recycling by reusing, repurposing, upscaling of aviation components and aircraft.

AFRA brings together manufacturers, recycling companies, disassembly organizations and aviation leasing companies across the aircraft industry to share best practices, standards, and innovations for end-of-life aircraft management. ~~We also offer accreditation and certification programs to ensure quality and traceability of recycled parts and materials.~~

We support the aviation industry in achieving environmental and circular economy goals when aircraft **are classified as at End-of-Service. AFRA** and encourage organizations ~~those who want to~~ take the AFRA Pledge, a voluntary commitment to promote (advance) the best practices for aircraft disassembly and recycling ~~and the reuse~~ of aviation components and aircraft.

We invite asset owners to join other organizations such as Boeing and Southwest Airlines in taking the AFRA Pledge and becoming part of a global network of industry leaders who are shaping the future of aviation.

By signing the AFRA Pledge, you will:

Demonstrate your corporate social responsibility and environmental stewardship.

Enhance your reputation and brand value among customers and stakeholders.

Increase your operational efficiency and profitability by maximizing the value of your assets and minimizing your risks.

Access the latest technologies and innovations for aircraft recycling and reuse.

Contribute to the development of a circular economy and a low-carbon future for aviation.

Don't let aircraft categorized as End-of-Service go to waste. Turn them into valuable resources and opportunities **by accepting and promoting** with AFRA's BMP accreditation programs. Contact us today to find out how we can help you achieve your goals and join the AFRA Pledge. Visit our website at www.afraassociation.org or call us at
